MAKASSAR  
2025

**STUDY PROGRAM OF MATEMATIKA - S1  
FACULTY OF MATHEMATICS AND NATURAL SCIENCES  
HASANUDDIN UNIVERSITY**

### **Vision**

The scientific vision is to become a study program with an international reputation in the development of mathematics based on the Indonesian maritime continent by 2030

### **Vision Strategy**

### **Mission**

To fulfill the above vision, the Undergraduate Mathematics Study Program has four missions, namely:

- Organizing innovative and effective mathematics learning to improve the quality and creativity of students in order to compete nationally and internationally.
- Improving a research culture that produces internationally reputable publications.
- Playing an active role in community service activities and collaborating with other academic institutions, government, business, media and society.
- Carry out governance in the Mathematics Study Program that is effective, efficient and transparent based on IT and ISO 9001:2015 standards to achieve the tridharma goals.

### **Graduate Profiles**

Gagal diterjemahkan

### **PLO charged to courses**

CPL-8 (S1) - The students have integrity that highly values the supreme divinity, social responsibility, and professional ethics

CPL-1 (ILO 1) - Students are able to demonstrate an advanced understanding of basic pure and simple applied mathematics.

### **Course Learning Outcomes (CLO)**

CPMK-1: The ability to decipher comprehensively atomic structure material, elemental periodic system, chemical bonds, chemical equilibrium, hydrocarbon compounds, functional groups of organic compounds, and biomolecular bases. (CPL8 dan CPL1)

CPMK-2: The ability to analyze problems or cases critically related to stoichiometric material, solution, acid-base equilibrium, chemical thermodynamics, chemical kinetics, and electrochemistry. (CPL8 dan CPL1)

### **Sub-CLO**

Sub CPMK-1: Students are able to explain the atomic structure. (CPMK-1)

Sub CPMK-2: Students are able to determine the periodic system of elements. (CPMK-1)

Sub CPMK-3: Students are able to explain chemical bonds (CPMK-1)

Sub CPMK-4: Students are able to conceptualize chemical equilibrium (CPMK-1)

Sub CPMK-5: Students are able to show hydrocarbon compounds (CPMK-1)

Sub CPMK-6: Students are able to separate the functional group of organic compounds. (CPMK-1)

Sub CPMK-7: Students are able to describe the basis of biomolecular. (CPMK-1)

Sub CPMK-8: Students are able to solve problems related to stoichiometry material. (CPMK-2)

Sub CPMK-9: Students are able to examine cases related to the solution material. (CPMK-2)

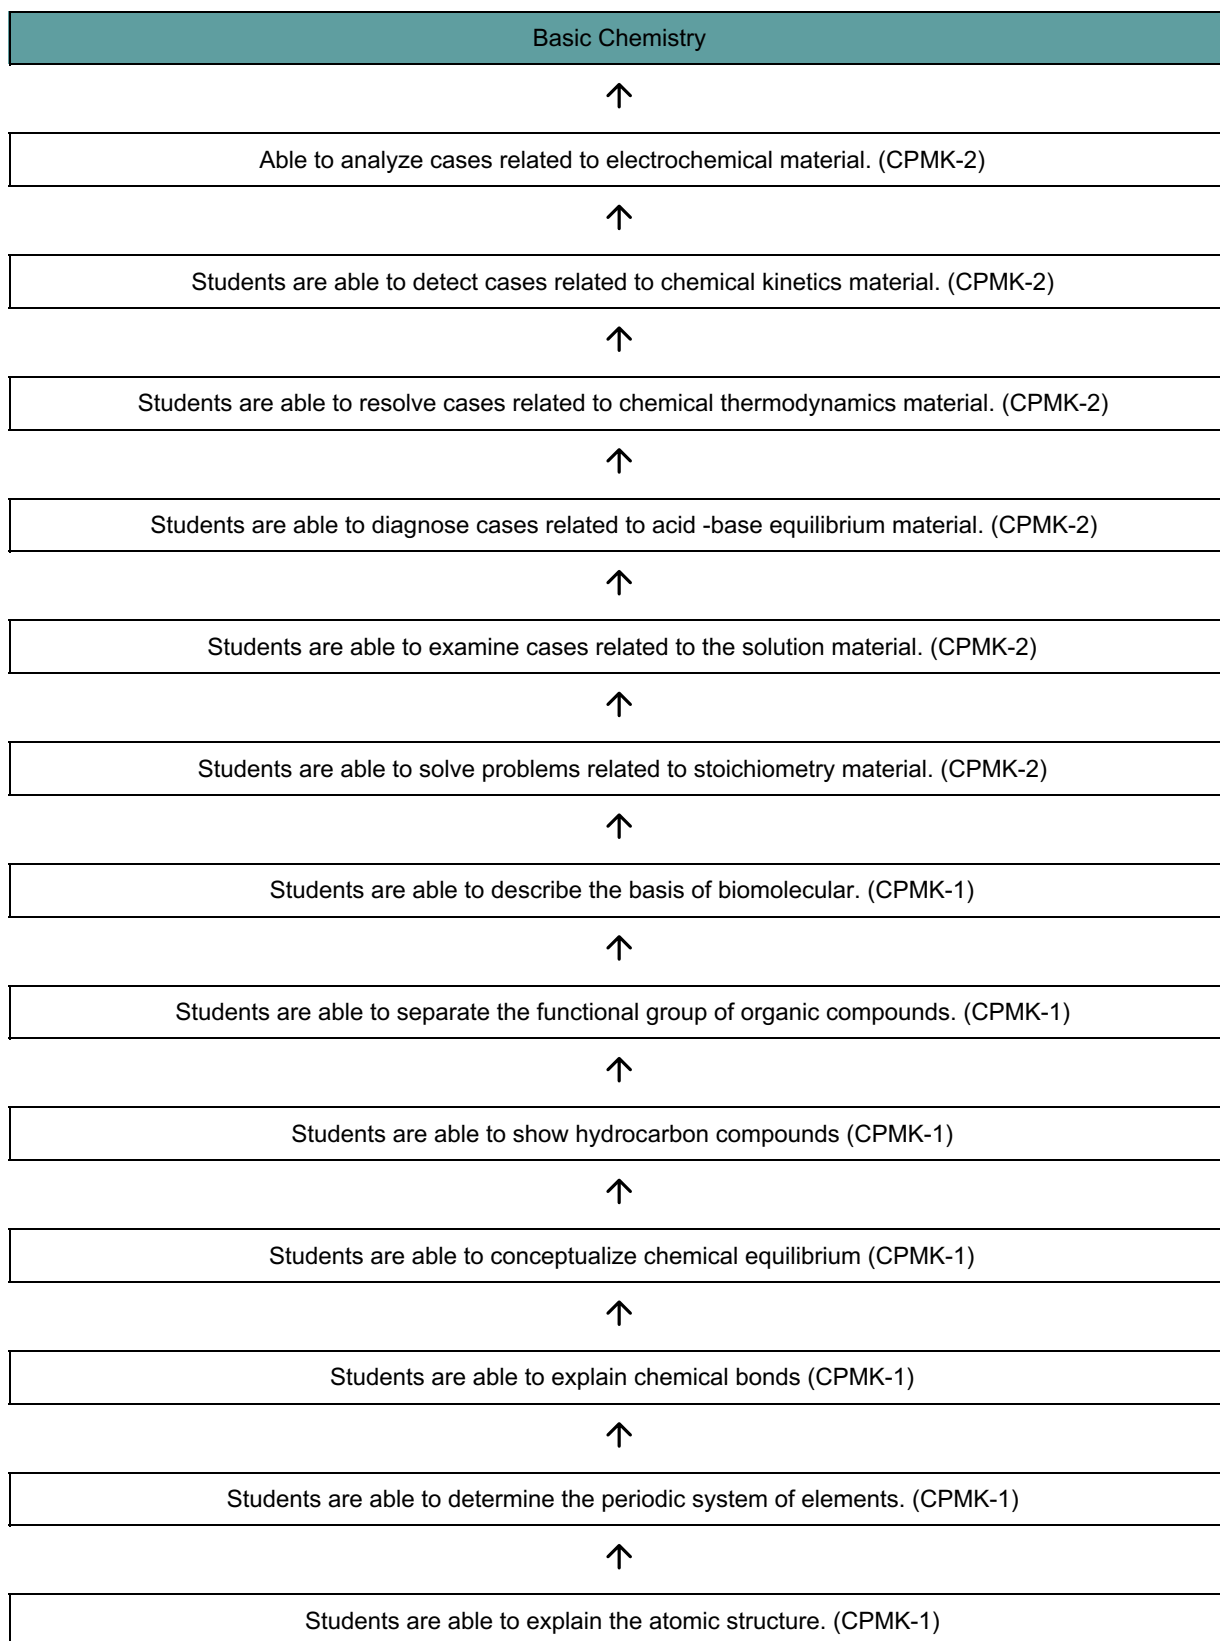

Sub CPMK-10: Students are able to diagnose cases related to acid -base equilibrium material. (CPMK-2)

Sub CPMK-11: Students are able to resolve cases related to chemical thermodynamics material. (CPMK-2)

Sub CPMK-12: Students are able to detect cases related to chemical kinetics material. (CPMK-2)

Sub CPMK-13: Able to analyze cases related to electrochemical material. (CPMK-2)
